

STAT

MEMORANDUM FOR: [redacted]

Phone D/OTR (Rodriguez) Mon. 8 Apr. Say I endorse planning for COINS training and Martin cognizant. (Martin thinks that today COINS is a "penny stock", and not sure we should commit to major training as may not be used. I should tell [redacted] each [redacted] may be too much.)

But tell Rodriguez we generally endorse planning, and overall we think the trend of the need for ISC is going to upward.

STAT

MEMORANDUM FOR: [redacted] *Aug 74*

Had telecon with Rodriguez today. Will call on him on return from west coast. Appears good rapport.

A FUTURE ACTION

He will allow COINS planning to go ahead. He doesn't know how to find resources to actually do the job. I said I wasn't sure the job was sized right yet, and did not endorse anything re actual ops -- only that the planning should be done and presented for review.

I told him that [redacted] was asking for CIA to support the operation.

I told him of origins of IHC ISC and Taylor

STAT

[REDACTED]
in response to 1968 PRIAB. I said that ~~xx~~ Info
Sci trg would be increasingly needed and it is
necessary to stay ahead of power curve.

I said I would support him in testifying to
the long range need. I cited saturation of OJCS
computers by Jan 75, plus OJCS projection of
[REDACTED] terminals needed per recent survey. I said
the info sci. problem had refused to stay under
the rug and now top mgmt had to face it and
there is a bill to be paid.
